Python

Junior Software Engineer with a background in communication design. My experience with graphic design in combination with full-stack development gives me the ability to provide a vertically integrated solution. My goal is to work in web and app development while connecting with both creatives and developers in order to create seamless, user-friendly, and engaging applications.

Experience

General Assembly
Student / 2020
General Assembly is an experiential education institution that offers a leading-edge curriculum from expert instructors that prepares the next generation of career professionals.
- Learned core skills to build full-stack web applications.
- Created strong conceptual wireframes that allowed for clear project management and group steering.
- Learned to effectively communicate and collaborate with UX/DI teams, clients, and other software engineers.

Dosist
Lead Guide / 2019 – 2020
Dosist is a modern wellness company empowering people to naturally manage their health & happiness.
- Guided guests through our wellness experience – focused on product knowledge and making connections within the community.
- Managed field events to educate potential investors and led internal employee training.

Hillstone Restaurant Group
Server / 2015 – 2019
Hillstone is a nationally established fine-dining restaurant group with 15 locations focused on inspired settings and graceful service.
- Worked in a fast pace, fine-dining restaurant.
- Achieved high time standards while working in a team-based environment.
- Maintained an extensive knowledge of the menu, spirits, wine, and food pairing.
